SUYASH DAHARWAL

Full Stack Developer | AI & Data Science Student

INTRODUCTION

I am a Full Stack Developer and AI/ML-focused student, experienced in frontend and backend development . I enjoy building scalable, intelligent, and user-friendly applications by combining modern web technologies with machine learning concepts

SKILLS

Languages: C++, Java (OOPs), Python, JavaScript, SQL
Frontend: React.js, HTML5, CSS3, Tailwind
Backend: Node.js, Express.js, REST APIs
Database: MongoDB (Aggregation), MySQL
Tools: Git, GitHub, Postman, Figma, VS Code

PROJECTS

Role-Based Hospital Management System
Full Stack (MERN) | 2025
- Built a secure RBAC system for Admins, Doctors, and Patients.
- Implemented complex MongoDB aggregation pipelines for data analytics.
- Integrated JWT authentication and responsive React UI

Hotel, Monastery & Event Booking System
Full Stack Project
- Booking system for hotels, monasteries, and events
- Ticket generation after booking
- User authentication

VideoTube Backend
Backend (Node.js/Mongo) | Oct 2025
- Designed a scalable video platform backend with video upload and processing.
- Optimized database queries using Mongoose aggregations.

EDUCATION

- B.Tech in Artificial Intelligence & Data Science
- *LNCT Group of Colleges | 2023 – 2027*
- CGPA: 7.8

ACHIEVEMENTS & CERTIFICATIONS

- SIH 2025 Participant: Developed a Hotel & Event Booking System.
- Solved 200+ DSA Problems: Consistent practice on LeetCode/GFG.
